

To whom it may concern: I am a long haul truck owner/operator. I am also a subscriber to XM Radio.

I use XM for safety and entertainment.

For safety reasons I can get on a channel and listen till i want to change not having to change due to being out of range or bad signal.

If I'm in an area I'm not familiar with I don't have to hunt for a channel. Also I can use the Traffic & Weather channel to plan my routes to avoid delays or bad weather in advance.

It is a very useful tool in my business which I pay for and would like to keep it that way.

The government wants drivers to be safe. This system keeps me from being distracted by trying to find local channels in traffic.

The selections available are very entertaining and makes the time go by easier.

Thanks, Billy R. Freeland
